

## TIMETERMINAL IS A SECURE, DYNAMIC TIME CLOCK APPLICATION.

TimeTerminal is a fast and convenient way to track employee time and labor information.

Available on smartphones and iPad. Employees and supervisors can punch and perform job labor transfers from anywhere a device is available. Staff can receive attestation prompts during the start and end of their shifts. TimeTerminal user functions are configurable and easy-to-use.

## ALWAYS RELIABLE

TimeTerminal captures punches in real-time and connects with Attendance on Demand. If an internet connection becomes unavailable, TimeTerminal will continue to operate off-line collecting employee transactions. Punches and transfers will remain stored on the device until an internet connection is re-established.

# TimeTerminal

TimeTerminal uses a simple interface for punching, transferring labor levels, and reviewing schedules or benefit balances. Options are available to limit the contact by enabling No Touch Punch™.

# TIME CLOCKS FOR YOUR BUSINESS

With TimeTerminal, employees can review schedules and see their benefit balances. Table top and wall mount (shown below) units available.

Several options are available with No Touch Punch. Employees can clock in and out by using badges, labels, or smartphones! All of these options are done with the use of a QR code.

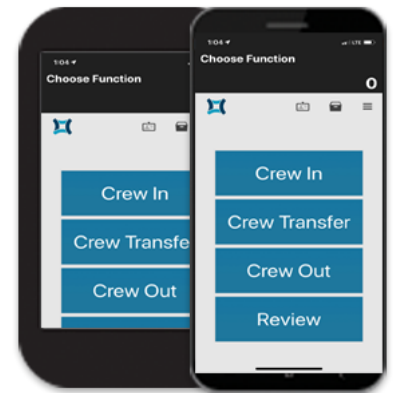

## SECURITY PHOTOS AND GPS

Optionally, TimeTerminal can be configured to take a photo of the employee when they punch in or out. This can be done along with recording the device GPS coordinates at the same time!

# TOOLS FOR YOUR MOBILE WORKFORCE

Crew leaders and supervisors can use TimeTerminal with ease. Clock multiple employees in and out using crew functions. Crew functions are designed to make it simple.

TimeTerminal is available for your smartphone, so it's great for your mobile workforce too!

Supervisors can punch and perform job labor transfers for multiple employees at the same time.

Devices can be secured with supervisor PIN to prevent transactions when a supervisor is not present.
